

HLC WHEEL LOADER SCALE SYSTEM

LOADING THE CORRECT WEIGHT
EVERY TIME

THE DISPLAY

MOBA'S HLC DISPLAY PROVIDES THE RIGHT TOOL FOR YOUR JOB SITE:

- EASY OPERATION FOR ANY USER THROUGH THE MOBA WHEEL
- RUGGED AND DURABLE DESIGN FOR HARSH WORK ENVIRONMENTS, INCLUDING CONSTRUCTION SITES
- CRITICAL MATERIAL AND LOAD INFORMATION OFFERED AT A GLANCE, IN REAL-TIME
- WEIGHING ASSISTANCE RIGHT IN THE CABIN

BENEFITS

01 CORRECT LOAD

Load the correct amount of material every time and keep track on what you are hauling

02 ELIMINATE OVERLOADING LIABILITY

Eliminate liability by avoiding truck and trailer overloading

03 REDUCE MATERIAL LOSS

Reduce the material loss to a minimum and save money, by knowing

04 COST EFFICIENCY

Improve cost efficiency by taking advantage of the full capacity of each bucket and every truck

05 REDUCE FUEL CONSUMPTION

Increase the volume of shipped material by maximizing each load, thereby taking advantage of savings with the use of your wheel loader

06 MAXIMIZE SAFETY

Maximize safety by keeping weight within legal limits, which eliminates accidents caused by overloaded trucks.

HLC WHEEL LOADER SCALE

Loading the correct weight every time

Due to the rising cost of equipment operations, it is critical to reduce operating expenses and improve fleet efficiency. With an on-board scale, you will always know the exact weight of each load. This saves you both money and material, while taking full advantage of the capacity of your wheel loader and trucks.

The MOBA HLC wheel loader weighing systems will support you in achieving safety standards and reduce your liability exposure when trucks go on the road. Preventing over and underloading reduces truck turn-arounds and improves fleet efficiency, while also reducing your risk to overload fines. Optimize your wheel loader machines today and get the most out of every load.

In this way, you profit from increased productivity, reduced liability and have a happy customer in the end.

Weighing systems from MOBA determine the exact weight of the material quickly and reliably to improve production efficiency and loading cycle times. The system adds up the weight of the material in each bucket and displays a running total loaded onto the truck for easy load management.
