

HLC-4000

WHEEL LOADER SCALE SYSTEM

Load and report the correct weight every time

THE DISPLAY

In a data driven world the HLC-4000 delivers. The HLC-4000 easy-to-read color touchscreen is packed with amazing features and functions which supports live data entry used in multiple field applications.

- 8 data list (1000/List)
- Cloud data solution
- Job templates
- On-screen diagnostic
- Backup camera (option)
- Tip-off & target mode
- Truck & multi-trailer loading
- Up to 5 attachments
- Print tickets
- Remote diagnostics & support

BENEFITS

- 01 CORRECT LOAD**
Load the correct amount of material every time and keep track of what you are hauling
- 02 REDUCE MATERIAL LOSS**
Reduce material loss to a minimum and save money to get the most out of every load
- 03 REDUCE FUEL CONSUMPTION**
Increase the volume of shipped material by maximizing each load, resulting in savings with the use of your wheel loader
- 04 ELIMINATE OVERLOADING LIABILITY**
Eliminate liability by avoiding truck and trailer overloading
- 05 COST EFFICIENCY**
Improve cost efficiency by taking advantage of the full capacity of each bucket and every truck
- 06 MAXIMIZE SAFETY**
Maximize safety by keeping weight within legal limits, which eliminates accidents caused by overloaded trucks

HLC-4000

WHEEL LOADER SCALE

LOAD AND REPORT THE CORRECT WEIGHT EVERY TIME

Due to the rising cost of operating equipment, it is critical to reduce operating expenses and improve fleet efficiency. With an on-board scale, you will always know the exact weight of each load. This saves time, money and material, while taking full advantage of your wheel loader and the truck capacity.

The MOBA HLC wheel loader weighing systems will support you in achieving safety standards and reduce your liability exposure when trucks go on the road. Preventing over and underloading reduces truck turnarounds and improves fleet efficiency, while also reducing your risk to overload fines. Optimize your wheel loader machines today and get the most out of every load.

In this way, you profit from increased productivity, reduced liability, and have a happy customer in the end.

Weighing systems from MOBA determine the exact weight of the material quickly and reliably to improve production efficiency and loading cycle times. The system adds up the weight of the material in each bucket and displays a running total loaded onto the truck for easy load Management.

With Moba's Hauling IQ - cloud-based reporting tools, you stay connected to your fleet and operations from anywhere.

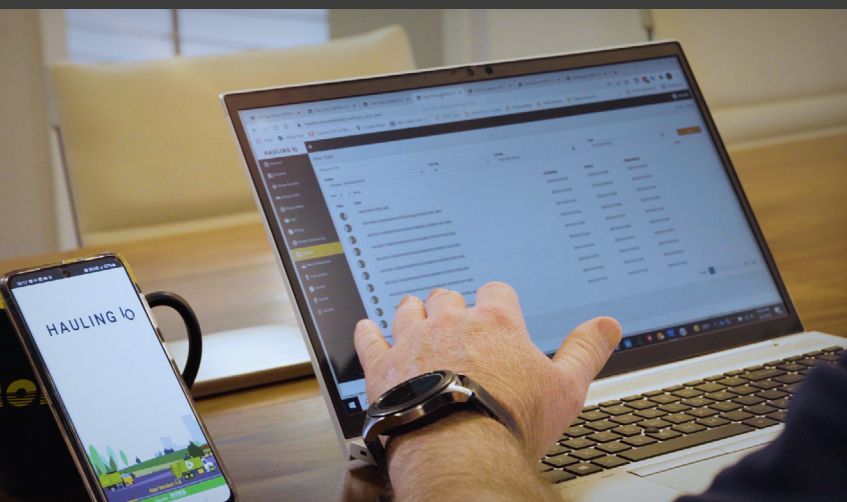

REMOTE DIAGNOSTIC SUPPORT

Reduce down time and keep service calls to a minimum. From anywhere in the world, remote support tools enable MOBA to:

- Install new software
- Download log files
- View and interact with the in-cab display remotely
